Education

University of Doha for Science and Technology (UDST), B.Sc. in AI and Data Science
GPA: 3.87/4.0, Dean's list each year
Relevant Coursework: Object-Oriented Programming, Database Management Systems, Discrete Structures, Linear Algebra,Intro to Data & Cyber Security.
In Progress (Fall 2026): Data Structures & Algorithms, Operating Systems, Machine Learning.

Experience

UPDIVE LLC, Doha, Qatar (QSTP Internship Program)
SWE Intern (Oct – Dec 2025) → AI Engineer, Part-time (Dec 2025 – Feb 2026)

- Rebuilt the company's customer-facing platform in React/Vite with full Arabic RTL localization, shipping product pages, service workflows, and a protected admin CMS on PHP APIs for publishing news and events.
- Built a bilingual Arabic/English RAG assistant over product documentation, tuning chunking and cross-lingual embedding search so Arabic queries resolve against English sources; 94% top-3 retrieval recall on a 50-question eval set.
- Automated tender sourcing with an n8n pipeline that scrapes listings and routes them to analysts over Telegram, replacing a manual daily search, alongside backend services for visitor analytics and an admin dashboard.

Data Scientist Intern, OrbiDefence • Part-time

- Built and evaluated fraud detection models in a 5-person team, running EDA, feature engineering, SMOTE balancing, and cross-validation to raise recall on a heavily imbalanced dataset.
- Owned model validation, using stratified cross-validation to select thresholds that held precision while recovering missed fraud cases.
- Deployed a Flask application with Docker and AWS for secure B2B delivery and IP/data protection.

Projects

Speaking Practice Telegram Bot | **Read More**

- Built an async Python chatbot to help users practice IELTS speaking.
- Integrated and optimized Whisper for transcription and Gemini AI for corrections and enhancements.
- Implemented user analytics with SQLite and deployed via Docker for scalability.

Cross-Language Communication Tool | **Read More**

- Co-developed a real-time translation bot for Uzbek-English-Arabic with 95%+ accuracy in both voice and text.
- Implemented an AI-powered payment verification system, cutting manual checks by 85%.
- Delivered an admin dashboard with analytics, subscription management, and automated usage alerts.

See full list of projects here: **Portfolio**

Achievements

- **2nd Place**, Tashkent City Math Olympiad – Qualified for Republic Math Olympiad (top 1% nationally).
- **Amiri Scholarship, UDST** – Awarded to only 20 international recipients worldwide for academic excellence.
- **8th Place, QU Math Championship(2025), Level 2** — Advanced track for engineering and science students; top 10 finish out of around 400+ participants as a second-year against upper-year competitors.

Technical Skills

- **AI & ML:** Python, RAG pipelines, embeddings, retrieval evaluation, local LLMs, Scikit-learn, Pandas
- **Engineering:** JavaScript, React, Flask, PostgreSQL, Docker, AWS, Git, n8n
